- Profile** A highly successful **C# / Sitecore / ASP.Net Analyst Programmer**, with over **15 years programming experience**, acquired across a diverse range of industries in a series of demanding roles. Proven success delivering projects under pressurised conditions. Whilst having the skills and confidence to work effectively as an individual, has the communication and collaboration skills required to work productively in a project team environment. With the ability to hit the ground running, is now seeking the next challenging and rewarding opportunity to demonstrate substantial abilities and make an effective contribution in a successful, end user focussed team.
- Education** 1994 - BEng (Hons) Aeronautical Engineering at Imperial College, London University.
- Prof Quals**
- Sitecore Developer Level 1 & 2
 - Microsoft Certified Professional Developer (MCPD) – Enterprise Applications Developer.
 - Microsoft Certified Technology Specialist (MCTS) – C# / ASP.NET Development
 - Microsoft Certified Professional (MCP) – Desktop and Distributed Windows Applications
 - Fully accredited PRINCE2 Practitioner.
- Expertise**
- C#, ASP.NET, MVC, .Net Framework 1.1 to 4.5
 - XHTML, XSLT, Javascript, CSS presentation layer.
 - AGILE Development & TDD.
 - Continuous Integration (NAnt / CruiseControl.Net / TeamCity).
 - WCF REST (Xml & related data serialization) / WebAPI.
 - Sitecore CMS Systems Development.
 - SQL Server
 - Design Patterns (incl. MVC & MVP). Object Orientated Analysis & Design.
- Achievements**
- **Atmosphere – Climate Science Exhibit 2010** – Single-handedly developed the web presence for the Atmosphere Climate Science exhibition launched at the Science Museum in early December by the Prince of Wales. The project was the culmination of a 5 year research project conducted by the museum. The website was written using .Net 3.5 technologies including a WCF synchronisation of website to isolated touch screen posts located within the museum. An MVC design pattern was used throughout in order to decouple the data and business model from the various presentation layers.
 - **The Open Golf Championship 2008** – Lead developer on the successful development of the official website for The Open Golf Championship 2008. This highly available site had over 12 million unique hits during the first 24hrs of the live event. Innovative concepts included Image Flow player profiles, Interactive World Map, and Timeline feature, and Web 2.0 feature integration (Twitter, Facebook, digit, etc.). The site also featured Akamai performance feature integration and a low latency 'live' scoring data pass-through from Unisys to BBC, and other broadcasters. The site was extremely well received by the R & A and the golf community.
 - **Manchester United international websites** – Senior Developer for release of Manchester United's key international web sites for (Korea, Japan, China & Malaysia). Particularly aggressive deadlines were adhered to.

Work Experience

Sep 2017 – Dec 2017

[Hult International Business School, London](#)

Senior Developer

Skills Applied: Fullstack/ C# 5.0 / Sitecore 8.2 / React.js / CSS / TeamCity / Octopus / NUnit

Websites: hult.edu/executive-education

Ground up development of new section to Hult's existing website. Having acquired Ashridge Executive Education, <http://www.hult.edu/executive-education> was created to replace an existing site to provide course information and booking capability.

Created using Sitecore 8.2, the design was heavily component oriented with Experience Editor at the forefront. Tools and skills used include: TDS, TDS code generator, MVC, Controller renderings,

Apr 2016 – Mar 2017

[Codehouse Group, London](#)

Senior Developer

Skills Applied: C# 5.0 / Sitecore 6.5 / TeamCity / Octopus / Agile / NUnit

Websites: A major financial website

Returned to Codehouse to work on a number of updated features to be integrated to a major financial website. These included making the site responsive to mobile viewports, and updating several sections of the existing site. Required working on a dual synchronised git branching, allowing maintenance to the existing code set whilst developing the feature branch in an up to date state. Was responsible for setting up and maintaining the CI and auto deployment using TeamCity and Octopus.

Dec 2015 – Mar 2016

[CPC Connect Ltd, London](#)

Contract Developer

Skills Applied: C# 5.0 / MVC6 / WebAPI / Docker Containers / Agile / NUnit

Websites: gaydar.net

Worked on the final phase to launch of the gay matchmaking site gaydar.net. This required a large number of WebAPIs to be developed, to pass data around the application.

Extensive use of Fiddler to develop and track data packets.

May 2015 – Dec 2015

[Codehouse Group, London](#)

Senior Developer

Skills Applied: C# 5.0 / Sitecore 7.1-8.1 / ASP.NET 4.5 / MVC4 / Agile / NUnit

Websites: A Chinese based legal firm

Worked on a number of projects of differing maturity, from Greenfield to third round feature additions.

Primary role was to implementing a number of new features to a mature multi-language (Chinese based) website using Sitecore 7.1. A particularly testing feature involved implementing a cross language search facility to meet exacting client requirements, using SOLR 4.3. This required implementing a structure that integrated European, and Asian-based languages to a single index using computed fields.

Other notable project work included:

- Upgraded Sitecore 6.6 through the various stages to v8.1 for another multi-lingual website.
- Implemented SOLR 4.10 site search from the ground up (Greenfield)

Apr 2015

Training & Qualification update

Attended the Sitecore 7.1 course and took/passed the developer upgrade examination.

Aug 2014 – Mar 2015

Property Management

Overseeing modernisation of apartments and assigning a new property management team for properties in France. This was not a professional assignment but a personal project relating to international properties owned by friends and family.

Jan 2014 – Aug 2014

Radley Yeldar, London

Contract Architect / Programmer

Skills Applied: C# 4.0 / Sitecore 6.5 / ASP.NET 4.0 / MVC3 / XSLT / Agile / NUnit

Website: A global construction group

Designed and implemented a required restructuring of the Sitecore database. This was implemented without issue. This included updating from version 6.3 to 6.5.

Adding new and improved Annual Review section to the website.

Development of internal Intranet specifically designed for new graduate trainees.

Implementation of a number of micro sites.

Sept 2013 – Dec 2013

Codehouse Group, London

Contract Programmer

Skills Applied: C# 4.0 / Sitecore 6.5 / ASP.NET 4 / Agile / TFS /

Website: A British financial group

Short contract with Codehouse to help launch a new website in Dec 2013. Assisting a team of developers develop and implement the final features, and works through post test snagging list.

Site was successfully launched on time, with all features.

Feb 2013 – Aug 2013

Radley Yeldar, London

Contract Analyst / Programmer

Skills Applied: C# 4.0 / Sitecore 6.4 / ASP.NET 4 / MVC3 / XSLT / Agile / NUnit

Websites: A global construction group

Third stint at Radley Yeldar. White label development of template site for a series of micro sites. Code written such that each new micro site can be added to the existing site structure without further code change.

Developing and implementing a number of small features, and a major review of the site's performance. Overhaul of the implemented caching setup.

April 2012 – Jan 2013

CIPFA, London

Contract Analyst / Programmer

Skills Applied: C# 4.0 / Sitecore 6.5 / ASP.NET 4 / XSLT / Agile

I had two main roles at CIPFA. Oversee the implementation of an externally developed Phase 1 website overhaul, assisting with debugging and developing missing features.

To train and mentor the development team to Sitecore level 2 developer standard.

Further to this, development and implementation of several Phase 2 features to the website.

Used Sitecore 6.5, C#/ASP.NET 4, OMS, WorldPay interactivity.

Nov 2011 – April 2012

The Science Museum, London

Contract Analyst / Programmer

Skills Applied: C# 4 / Sitecore 6.4 / ASP.NET 4 / XSLT / Agile / WCF

Returned to The Science Museum. Additional features added to the existing Educators section of the website. Consolidation of the existing templates, layouts and code. Upgrading to Sitecore 6.4. Using C# 4 / ASP.NET 4.

June 2010 – Aug 2010 / Sept 2011 – Nov 2011

Radley Yeldar, London

Contract Analyst / Programmer

Skills Applied: C# 4.0 / Sitecore 6.4 / ASP.NET 3.5 / XSLT / Agile / NUnit

Arup.com – Implemented a number of design changes to the Arup.com website. Worked with a front end designer to complete the task. Technologies used Sitecore 6.4 using C# 4.0 / ASP.NET 3.5 SP1 / MVC3 / XSLT. Introduced unit testing and test driven methodology using NUnit.

Finished the initial project early, and was asked to implement a new internal diagnostic reporting section for Brit Insurance website.

July 2010 – March 2011

The Science Museum, London

Contract Analyst / Programmer

Skills Applied: C# 3.5 / Sitecore 6.2 / ASP.NET 2.0 / XSLT / Agile / WCF

Sole developer for the launch of the [Atmosphere – Climate Science](#) exhibit project website. Built on Sitecore 6.2 using C# 3.5 / ASP.NET 3.5 SP1 / XSLT. Xml data transfer to external systems using WCF REST, with both xml and Json format types. Went live on time, within budget on 3rd Dec 2010

Implementing a redesign of the [Educators](#) sub section of the museums website. Again using the technologies listed above. Designed and implemented an updated working development environment, synchronising in-house and out-sourced development sources.

Feb 2009 – Jan 2010

TDA, London

Contract Analyst / Programmer

Skills Applied: C# 2005 / Sitecore 5.3 / ASP.NET / XSLT / Agile / TDD

Job Description : Development of the TDA's public-facing website and related partner-facing extranets, as well as their intranet, using Sitecore Content Management System, and the .NET framework. Template layouts written as ASPX/ASCXs and renderings as XSL transformations of the XML-based data.

Extensive use of MVP design pattern across all sites, allowing for greater code sharing and full decoupling of UI from business logic.

Responsible for design and development of templates and associated layouts & renderings, design and development of embedded applications using C#/ASP.NET backed by SQL Server. Specific projects included a subscription based email notification system, photo gallery, white labeled regional extranet (eight regional sites, one codebase). Also responsible for ensuring e-Government, W3C-AA and WCAG compliance. This was an agile environment, working to weekly or bi-weekly iterations.

Oct 2007 – Aug 2008

IMG Digital Media London

(subsequently became Endava)

Contract Analyst / Programmer

Skills Applied: C# 2.0 / Sitecore 5.3 / XSLT / Agile

Open Golf Championship 2008 - Lead Developer for the development of the official Open Golf Championship 2008 (www.opengolf.com). Technologies employed Agile, C#, XSLT, CMS (Sitecore), Team Foundation Server 2005, Media Streaming, Akamai caching, Ajax, low latency XML streaming provided live scoring and statistics from data supplied by Unisys. Continuous integration using a dedicated build server. Unit testing was employed throughout.

IMG Media Library – Lead Developer for an in-house Media Library. The library stored all forms of media for use on numerous client websites. Pitch-side uploads from sporting events, and syndication. (Images, audio, video,

podcast, RSS etc). Techniques employed Agile, C#, Team Foundation Server 2005, Continuous Integration, Microsoft Enterprise Application Blocks (Exception Handling, Logging, Policy Injection and Security Application Blocks were all integrated). 100% code coverage unit testing.

Manchester United - Senior Developer for the delivery of three Manchester United international sites to the Far East. (China, Korea and Japan). Links to the sites appear on the official site www.manutd.com. Techniques employed Agile, C#, Subversion source control. XSLT, CMS (Sitecore), HTML, CSS, AJAX.

May 2007 – Oct 2007 & Aug 2008 – Feb 2009

Cabot Aviation, Reigate

Contract Analyst / Programmer

Skills Applied: C# 3.5 / Web Services / ASP.NET

Job Description: Leading a small team, integrating three disparate systems, providing secure remote access for sales team. Sales (bespoke SQL Server based), HR (Snowdrop) & Accounts (Access Accounting)..Net Framework 3.0, C#, ASP.Net, AJAX.Net, Visual Studio Team Suite 2005.

Following a successful contract period with Cabot in 2007, I was re-engaged to write a series of web services to enable synchronisation of client and sales data to the central system from remote locations. Technologies applied included .Net Framework 3.5, C#, Web Services, Visual Studio Team Suite 2008.

Nov 2006 – Apr 2007

LBI Ltd, London

Contract Analyst / Programmer

Skills Applied: C# 2005 / ASP.NET 2.0 / Web Services

Job Description: Worked on one of the company's most prolific client projects (EMap) helping develop to launch two websites (www.motorcyclenews.com and www.todaysgolfer.co.uk). Both sites were successfully delivered, significantly increasing the client's subscription base. The 'white label' approach to the project will allow the client to easily incorporate other magazines in its portfolio. Technologies employed during the development were EpiServer (Content Management System), Star Community (Community Software), Endeca (Information Access Platform), ASP.NET 2.0, C#2.0, Team Foundation Server 2005, SQL Server 2005, extensive XML, AJAX, WebServices, Multimedia streaming. Complete separation of presentation and code layers. Design patterns applied to allow flexibility to add further magazines without base code changes.

Jan 1998 – Aug 2005

Asyst Solutions Ltd, London

(subsequently merged into **Access Accounting Ltd** 2006)

Associate Director for Technical Services

Joined Asyst in 1998 as a Consultant Programmer, progressing through roles of Senior Consultant, Principal Consultant, Technical Architect to the role of Associate Director. Worked on a number of business critical projects, using a variety of development tools and products, across a wide range of industries. Listed below, and briefly described, is a selection of key projects in which I was significantly involved:

▪ **Asyst Commercial Software Suite (2002 - 2005)**

Skills Applied: C# 2005, ASP.NET 2.0, ADO.NET, XML, SQL Server 2000

Role: Technical Architect / Programmer (team of 10 developers)

Job Description: The Greenbean Software Suite is Asyst's commercial software offering. Fully integrated to their parent company's accounting package, Access Accounts. The initial offering stemmed from my test case conversion of the classic ASP Work Based Learning software to .Net Framework using C#/ASP.NET.

Interests

- Rugby – have played for Blackheath, Beckenham, Brighton and Hammersmith & Fulham. Currently playing and coaching minis at Teddington.
- Technology, Cycling, Skiing, Reading, Music.
